

## MY 2024 HEQMS Reporting Table<sup>1</sup>

For MY 2024, health plans must report to the DMHC, via the NCQA summary level results file, stratified rates for ten measures and aggregate rates for all 13 measures.

<sup>1</sup> Health plans must submit the NCQA summary level measure results file to the DMHC for all measures, regardless of whether the results file includes both aggregate and stratified results or aggregate only.

<sup>2</sup> For MY 2024, the NCQA will retire the traditional reporting method for the Colorectal Cancer Screening measure (COL), and health plans will only report to NCQA via ECDS (COL-E). The DMHC will require health plans to report via ECDS for this measure for MY 2024 and subsequent years.

<sup>3</sup> Previously the NCQA called this measure Hemoglobin A1c Control for Patients with Diabetes.

<sup>4</sup> Beginning with MY 2024 this measure will be included in CMS reporting requirements.
